## Reusable Container Collection System by OZZI

**OZZI** is a revolutionary system that eliminates traditional disposable take-out containers for all segments of the food service industry by utilizing enhanced technology. It is a truly amazing system that is changing America from a disposable society into a nation that is devoted to more sustainable and ecologically minded reusable containers.

### OZZI Facts

- ◇ The OZZI system pays for itself through a reduction in operations cost
- ◇ Eliminates disposable products by replacing them with 100% reusable products
- ◇ Creates a simple, cost-effective exchange for its participants
- ◇ Minimal staff monitoring and employee interaction necessary
- ◇ O2GO reusable containers eliminate the cost and volume of paper and foam products often associated with food service operations, lessening the dependency on fossil fuels and reducing your carbon footprint
- ◇ O2GO reusable containers reduce landfill waste, thus saving money on waste hauling
- ◇ The OZZI system is the only patented process to collect and redeem reusable products
- ◇ Meets and exceeds health department regulations regarding use of reusables in food service

### Three Simple Steps:

1. Place food in O2GO container
2. Enjoy meal
3. Return used container to OZZI machine

### Patented Design

- ◇ Holds approximately 125 containers
- ◇ Touch screen display
- ◇ Bar code scanning
- ◇ Token and/or CBORD card reader integration
- ◇ Ethernet enabled
- ◇ Machines can be customized with your logo and/or personal message

### System Specifications

- ◇ 36" w. x 30" d. x 72" h.
- ◇ Weight: 400 lb
- ◇ Operating temperature range 50°F. to 104°F.
- ◇ 120V 60 Hz 15A standard
- ◇ Made in the USA
